3 Ways D2L Brightspace Supports Data-Driven Decisions

Easy-to-action, on-time information that supports student growth is a requirement. Improve learner outcomes and empower instructors to make data-driven decisions with dashboards and advanced analytics in Brightspace.

## UNDERSTAND PERFORMANCE WITH CLASS PROGRESS

Faculty can view, compare and track class and learner performance at a glance with the Class Progress tool. Dive deeper into metrics by simply clicking on a student's name or one of the nine customizable key performance indicators.

GET A BIRDSEYE VIEW WITH POWERFUL REPORTS

Administrators can pull over 100 actionable Data Sets for further analysis in Data Hub or external third-party tools. They can create custom reports and visualizations and can communicate results effectively across the institution with the Insights Report Builder tool.

RELY ON DATA TO INDIVIDUALIZE LEARNING

Create a custom learning path through courses based on achievement and provide helpful nudges with automated communications set up to trigger based on pre-determined milestones. Advisors can support students with easier interventions that have maximum impact on student success. They can also access up-to-date information to guide decision making and improve adoption, learner engagement, retention and completion rates with Insights dashboards.
