## Great technology is non-negotiable. Move beyond a learning management system with D2L Brightspace.

### From Disruption

#### LEARNERS

- Underwhelming content
- One-size-fits-all learning

#### FACULTY

- Increasing demands
- Manual processes
- Multiple systems

#### LEADERSHIP

- Disparate systems
- Lack of insight from data
- Unsupported

### To Innovation

- Engaging learning experiences
- Highly personalized
- Consistent on any device

- Automation & personalization at scale
- Single system for teaching & learning

- Integrated ecosystem
- Actionable data
- Trusted partnership

“Brightspace gives me lots of capability to flexibly deliver things to students. It has made my job as an instructor much more manageable”

Deb McManimon, Business Faculty  
(Riverland Community College)

About *Inside Higher Ed* ..... 84

# INTRODUCTION

This survey was administered online in March and April of 2022. Results include 178 respondents following data cleaning. Written analysis for the overall results is found throughout the report, along with some analysis based on sector and some longitudinal narrative in the appendix for specified sections. Results for the following segmentations can be found in the accompanying data supplement: Sector, Public Institutions and Degrees, Private Institutions and Degrees, and Region. Currently serving as a provost or chief academic officer at a four-year Private, four-year Public, two-year Public, or For-profit institution.

## METHODOLOGY

- Hanover sent invitations via email to 2,120 provosts, with regular reminders sent throughout the March 8 – April 8, 2022, field period. Hanover collected 178 fully or partially completed surveys, yielding an 8.4 percent response rate.
- The survey is an attempted census of all provosts using the most comprehensive sample information available to target all eligible U.S. colleges and universities from the Integrated Postsecondary Education Data System (IPEDS) database. The margin-of-error for this survey is 7.03 percent given a total n-count of 178.
- After data collection, Hanover identified and removed low-quality respondents.
- Specialty colleges - namely, Bible colleges and seminaries with a Carnegie Classification of 24 - and institutions with an enrollment of fewer than 500 students were excluded from the sample.
- Sample sizes vary across questions as some questions only pertain to a subset of respondents.
- Conclusions drawn from a small sample size ( $n < 20$ ) should be interpreted with caution.

## METHODOLOGY (CONT.)

- “Don’t Know or Not Applicable” responses, and equivalent, are often excluded from the figures and analysis in order to focus on respondents who did express an opinion.
- For full aggregate and segmented results, please consult the accompanying data supplement. Due to small sample sizes, some sectors have been excluded. The 2018 Carnegie Classification was used to determine sector classifications. Some colleges lacked a classification and were excluded from those segmentations.
- For simplicity and clarity, this analysis refers to both “Provosts” and “Chief Academic Officers” as “Provosts”.
- Some totals in the survey may not sum to 100 percent due to rounding.

	All Institutions, by Sector				Public			Private Nonprofit	
	All	Public	Private Nonprofit	For-profit*	Doctoral	Master's/ Bacc.	Associate	Doctoral/ Master's	Bacc.
<b>Total sample size</b>	178	83	87	8	14	23	44	51	35

Note: An asterisk (\*) indicates that data is not reported for these groups due to small sample size.

# HIGH LEVEL KEY FINDINGS

- Most provosts indicate that the academic health of their institution is either good or excellent, and that changes made during the pandemic have not negatively impacted the academic quality of their institution. No provosts indicate that their academic health is failing, 54 percent rate it as good or excellent. While provosts are confident about the academics of their institution, they rate their institution less favorably when evaluating support for faculty and students' families. Namely, only 22 percent of provosts agree that their institution very effectively recruits and retains talented faculty. Finally, only 31 percent of provosts agree that their institution effectively controls rising prices for students and families.
- Most provosts are satisfied with their institution's general education program, and about half of provosts report that their institution recently evaluated the effectiveness of their general education requirements. In addition, most provosts (89 percent) have a positive view of liberal arts education and agree that liberal arts education is central to undergraduate and professional education. A similar proportion of provosts agree that the concept of liberal arts education is not well understood in the U.S. (88 percent).
- Almost all provosts (86 percent) agree that healthy undergraduate education requires healthy departments (such as English); yet most (69 percent) also agree that STEM and professional programs being prioritized by politicians and board members. Provosts are clearly split on whether they agree that the number of students in a program is an appropriate way to determine which departments to cut, such that 30 percent neither agree nor disagree, and few provosts hold strong agreement or disagreement.
- Provosts are split on whether the financial situation at their institution has improved in the last year, and about 41 percent say that their institution used the economic downturn in 2020 to make changes in their academic budgets. Almost all provosts (87 percent) indicate that financial concerns are prevalent in their institution's discussion about launching new academic programs. In addition, provosts indicate that they have clear priorities over the next year. For instance, 87 percent of provosts plan to prioritize collaboration with other colleges and universities, and only 4 percent would like to prioritize cutting athletic programs. Other priority areas include expanding online programs and offerings (85 percent), and funding programs based on their alignment with the university's mission (81 percent).

## HIGH LEVEL KEY FINDINGS (CONT.)

- About two-thirds of provosts report that their institution adjusted campus operations in response to the Omicron variant, while 39 percent report that their campus did not. Many institutions moved classes temporarily online (41 percent). Almost all provosts believe that their communication with faculty during this academic year about pandemic-related matters has been at least somewhat effective. Provosts report that during the pandemic, once-a-week communications with faculty are the most common, and less than once a month and daily communication are the least common.
- More than half (59 percent) of provosts report that faculty currently feel very engaged with their work, but they have concerns that faculty do not feel supported or connected to the administration. Provosts are most likely to report that the deans and chairs (79 percent) at their institution are primarily responsible for ensuring faculty are supported, engaged, and connected. Provosts from private institutions are more likely to report that faculty at their institution are at least very engaged (67 percent for private institutions, and 51 percent for public institutions). In addition, most provosts (83 percent) believe faculty at their institution would say that they do not have the right resources and tools to help them feel supported, engaged, and connected.
- Most provosts (70 percent) report that their institution surveys its faculty, staff, and administrators to assess their job satisfaction. However, about half of provosts (51 percent) report that they neither agree nor disagree that their institution has taken concrete steps to address faculty burnout. Provosts also report that faculty and staff turnover rates differ at their institution, such that 48 percent of provosts indicate that faculty turnover has been at least somewhat higher, but 74 percent of provosts indicate that staff turnover has been at least somewhat higher. Finally, about half of provosts report that their institution has altered its employment policies in a way that will give employees more latitude to work remotely after the pandemic ends.
- A little less than two-thirds of provosts agree that tenure remains important and viable at their institution. When considering a system of long-term contracts over the existing tenure system in higher education, about 60 percent of provosts indicate they would favor, and 40 percent would oppose.

## HIGH LEVEL KEY FINDINGS (CONT.)

- Provosts are more likely to be aware of faculty, staff, and undergraduate mental health than graduate student mental health. Provosts indicate that they are most likely to be very aware of faculty mental health (65 percent), followed by undergraduate students (53 percent), staff (44 percent) and graduate students (25 percent). Provosts at private institutions are more likely to be at least somewhat aware of graduate student mental health (82 percent) compared to only 49 percent of provosts from public institutions. Finally, provosts are most likely to indicate that informal in-person conversations and one-on-one meetings with leaders are the most helpful when it comes to increasing their awareness of general mental health of faculty, staff, and administrators.
- Most provosts agree that their college responds effectively and fairly to allegations of sexual harassment; and that a finding of sexual harassment by a tenured faculty member should be treated as grounds for dismissal. About one-fourth of provosts report that there have been allegations of sexual harassment against faculty members at their institution within the past year. Overall, provosts tend to be either not very concerned (48 percent) or not concerned at all (23 percent) that there will be a backlash against college's efforts to prevent sexual assault and sexual harassment.
- Most provosts do not believe that graduate students should have the right to unionize; given that a graduate student's primary role is a student, and their second role is an employee. Very few provosts (4 percent) indicate that their college has a graduate student union.
- Since the widespread protests against police brutality, provosts are most likely to indicate that their institution has at least considered re-examining curriculum to assure it is inclusive and diverse. Most report that faculty at their institution were receptive to new changes to policies and practices, and that their institution was quite comfortable making said changes. On average, 63 percent of provosts report that faculty at their institution were at least very receptive to changes. Provosts from private institutions are more likely than provosts at public institutions to report that their staff were at least very receptive (71 percent for private, 54 percent for public).

KEY FINDINGS FOR ALL FIGURES

# ACADEMIC HEALTH

Most provosts indicate that the academic health of their institution is either good or excellent, and that changes made during the pandemic have not negatively impacted the academic quality of their institution. No provosts indicate that their academic health is failing, and they are most likely to rate it as good (54 percent). There are no significant differences between provosts at private non-profit institutions and public ones.

**How would you assess the “academic health” of your institution (i.e., the academic quality of the education your institution provides) as of the fall of 2020? (n=173)**

**To what extent do you agree or disagree with the following statement: Changes made during the pandemic over the last two years have negatively impacted the academic quality of my institution. (n=173)**

KEY FINDINGS FOR ALL FIGURES

# EFFICACY: ACADEMICS AND SUPPORT

Provosts are likely to rate the efficacy of their institution favorably when evaluating academics but rate their institution less favorably when evaluating support for faculty and students' families. Provosts are most likely to indicate that their institution provides a quality undergraduate education (98 percent), however only 22 percent indicate that their institution very effectively recruits and retains talented faculty. Provosts at public institutions (94 percent) are significantly more likely than provosts at private institutions (73 percent) to indicate that their institution is at least somewhat effective at controlling rising prices for students and their families.

## How would you rate the effectiveness of your institution in the following areas? (n=172)

KEY FINDINGS FOR ALL FIGURES

# EFFICACY: ACADEMICS AND SUPPORT (CONT.)

Identifying and assessing student outcomes

Recruiting and retaining talented faculty

Controlling rising prices for students and their families

KEY FINDINGS FOR ALL FIGURES

# PERCEPTIONS OF GENERAL EDUCATION

Most provosts tend to hold favorable opinions on general education and its role in a college degree. Provosts (90 percent) are very likely to agree that general education requirements are a crucial part of any college degree. However, provosts may also believe that students and faculty are less apt to value general education. About three-fourths (65 percent) of provosts agree that faculty are excited to teach general education courses, but only 32 percent of provosts agree that students at their institution understand the purpose of general education requirements.

**Please indicate your level of agreement with the following statements regarding general education requirements. (n=163)**

KEY FINDINGS FOR ALL FIGURES

# SATISFACTION WITH GENERAL EDUCATION

Most provosts are satisfied with their institution’s general education program, and about half of provosts report that their institution recently evaluated the effectiveness of their general education requirements. Provosts (71 percent) are likely to be at least satisfied with their college’s general education program. However, provosts’ responses vary more when reporting whether their college recently evaluated the effectiveness of their general education requirements. In addition, provosts at private institutions (36 percent) are significantly more likely than those at public institutions (18 percent) to strongly agree.

**How satisfied or dissatisfied are you with your institution’s general education program and requirements? (n=163)**

**Please indicate your level of agreement with the following statement: My college recently evaluated the effectiveness of our general education requirements. (n=162)**

**KEY FINDINGS FOR ALL FIGURES**

# LIBERAL ARTS EDUCATION

Most provosts have a positive view of liberal arts education and agree that liberal arts education is central to undergraduate and professional education. A similar amount of provosts agree that the concept of liberal arts education is not well understood in the U.S. (88 percent). In addition, provosts at private institutions (95 percent) are significantly more likely than those at public institutions (85 percent) to agree that liberal arts education is central to undergraduate and professional programs.

**Please indicate your level of agreement with the following statements about liberal arts education: (n=165)**

KEY FINDINGS FOR ALL FIGURES

# LIBERAL ARTS EDUCATION (CONT.)

I feel pressure from my president, board, or donors to focus on academic programs that have a clear orientation toward careers.

Liberal arts education in all types of institutions in the U.S. is in decline.

Liberal arts education has become too divorced from the career needs of students and graduates.

Liberal arts faculty members are not sufficiently interested in the desire of parents and students for career preparation.

KEY FINDINGS FOR ALL FIGURES

# PROGRAM PRIORITIES

More than half of provosts indicate that politicians and board members are prioritizing STEM and professional programs over those that support general education. Almost all provosts (86 percent) agree that healthy undergraduate education requires healthy departments in liberal arts fields; yet most (69 percent) also agree that STEM and professional programs being prioritized. Provosts are clearly split on whether they agree that the number of students in a program is an appropriate way to determine which departments to cut, such that 30 percent neither agree nor disagree, and few provosts hold strong agreement or disagreement.

**Please indicate your level of agreement with the following statements: (n=160)**

High-quality undergraduate education requires healthy departments in liberal arts fields (e.g., English, history, political science, and other liberal arts fields).

Politicians and board members are prioritizing STEM and professional programs over those that support general education.

The number of students majoring in a program is an appropriate way to determine which departments to cut.

KEY FINDINGS FOR ALL FIGURES

# PROGRAM PRIORITIES - BUDGETING

Provosts are most likely to anticipate that professional programs will be prioritized in the next budget year, and that arts and sciences programs will be the least prioritized. Specifically, about two-thirds of provosts (66 percent) anticipate the prioritization of professional programs, compared to 30 percent of provosts who anticipate the prioritization of arts and sciences programs. Survey results did not reveal any significant regional differences or differences between provosts representing public and private institutions.

**Please indicate your level of agreement with the following statements: I anticipate major allocation of funds to the following categories in the next budget year. (n=160)**

KEY FINDINGS FOR ALL FIGURES

# STUDENT DATA AND EVALUATION

Most provosts (85 percent) report that their institution uses data to measure student outcomes. Specifically, provosts are most likely to agree that faculty members at their college view assessment as requiring a lot of work on their parts (83 percent); however, they also report that their college regularly makes changes in the curriculum, teaching practices, or student services based on what it finds through assessment (71 percent). Provosts (20 percent) are least likely to agree that their college’s use of assessment is more about keeping accreditors and politicians happy than it is about teaching the learning.

**Most colleges have now been engaged in assessment of student learning for a number of years. Given that, please indicate your level of agreement with the following statements. (n=153)**

Faculty members at my college view assessment as requiring a lot of work on their parts.

My college regularly makes changes in the curriculum, teaching practices, or student services based on what it finds through assessment.

At my college, assessment has led to better use of technology in teaching and learning.

The growth of assessment systems has improved the quality of teaching and learning at my college.

Faculty members value assessment efforts at my college.

My college's use of assessment is more about keeping accreditors and politicians happy than it is about teaching and learning.

KEY FINDINGS FOR ALL FIGURES

# TEXTBOOKS AND RESOURCES

Most provosts' views about textbooks and resources tend to be centered towards student interests. For instance, 57 percent of provosts agree that open educational resources are sufficient and should be used in most general education courses. In addition, 59 percent of provosts report that their institution allows faculty to profit from the sale of textbooks they wrote and assign to their students as course readings, but 41 percent report that their institution does not allow it.

At the same time, provosts are split on limiting faculty member control over selection of materials for the courses they teach; such that 40 percent of provosts agree, but 22 percent of provosts are neutral, and 39 percent disagree. Provosts representing public institutions (49 percent) are more likely to agree than those representing private institutions. (31 percent).

### Please indicate your level of agreement with the following statements regarding textbooks: (n=152)

Open educational resources (freely available online materials) are of sufficiently high quality that they should be used in most general education courses.

Faculty members who are authors of books or materials should never profit from the sale of those books or materials to their own students.

Faculty members and institutions should be open to changing textbooks or other materials to save students money, even if the lower-cost options are of lesser quality.

The need to help students save money on textbooks justifies some loss of faculty member control over selection of materials for the courses they teach.

## KEY FINDINGS FOR ALL FIGURES

# FINANCIAL OUTLOOK

Provosts are split on whether the financial situation at their institution has improved in the last year, and about 41 percent say that their institution used the economic downturn in 2020 to make changes in their academic budgets. Almost all provosts (87 percent) indicate that financial concerns are prevalent in their institution's discussion about launching new academic programs. Although provosts tend to report that budgets are a concern at their institution, only about 22 percent of provosts report that their institution needs to reduce the numbers of academic programs it offers by the end of the 2021-2022 academic year. Survey results do not show significant regional or sector-level differences.

### Please indicate your level of agreement with the following statements about budget and finances: (n=149)

**KEY FINDINGS FOR ALL FIGURES**

# PRIORITIES

Survey results show that provosts have clear priorities and plans to increase emphasis on specific areas over the next year. For instance, 87 percent of provosts plan to prioritize collaboration with other colleges and universities, and only 4 percent would like to prioritize cutting athletic programs. Other areas of priority include expanding online programs and offerings (85 percent), and fundings programs based on their alignment with their mission (81 percent). Provosts at private and public universities only differed on how much they plan to prioritize increasing teaching loads for full-time faculty members (15 percent for private institutions, 5 percent for public institutions).

**Please indicate whether you plan to increase emphasis on the following practices at your institution over the next year. (n=167)**

**KEY FINDINGS FOR ALL FIGURES**  
**PANDEMIC RESPONSE**

About two-thirds of provosts report that their institution adjusted campus operations in response to the Omicron variant, while 39 percent report that their campus did not. Provosts are most likely to indicate that their institution moved classes temporarily online (41 percent). Survey results did not show any significant regional or sector-level differences. Over three-fourths of provosts strongly agree that they were significantly involved in the decision-making processes related to adjusting on-campus operations due to the Omicron variant; thought they are less likely to strongly agree that faculty decision were significantly considered (31 percent).

**Did your institution do any of the following in reaction to the omicron variant?  
 Please select all that apply. (n=178)**

**To what extent do you agree or disagree with the following statements? (n=108)**

KEY FINDINGS FOR ALL FIGURES

# PROVOST RESPONSIBILITIES

Almost all provosts report that the volume of their job responsibilities increased due to the pandemic. Overall, 85 percent of provosts indicate that they are glad they pursued administrative work, and 25 percent report that their job is more focused on financial and management issues than on academic issues. Provosts' responsibilities differ among public and private institutions such that provosts from public institutions are less likely to indicate that their job is more focused on financial and management issues than on academic issues (16 percent) compared to provosts from private institutions (35 percent).

## How did the pandemic affect the volume of your responsibilities? (n=178)

## Please indicate your level of agreement with the following statements: (n=149)

KEY FINDINGS FOR ALL FIGURES

# PANDEMIC COMMUNICATION

Almost all provosts are likely to indicate that they believe that their communication with faculty during this academic year about pandemic-related matters has been at least somewhat effective. Provosts' frequency of communication with faculty about pandemic-related matters is also approximately normally distributed, with once-a-week communications being the most common, and less than once a month and daily communication being the least common. Survey results do not show significant differences in either effectiveness or frequency at the regional or sector-level.

**How effective do you believe you (or your office) has been at communicating with faculty during this academic year about pandemic-related matters? (n=178)**

**During the pandemic, how frequently do you (or your office) directly communicate with faculty? (n=178)**

## PANDEMIC COMMUNICATION (CONT.)

Provosts are most likely to report that they have communicated with their staff about the same amount as the year before. Specifically, 46 percent report the same amount of communication, 33 percent report more frequent communication, and 21 percent report less frequent communication. Survey results do not show significant differences in either effectiveness or frequency at the regional or sector-level.

### Have you decreased or increased the frequency with which you (or your office) communicates with faculty this academic year as compared to the last one?

My office communicates with faculty... (n=178)

**KEY FINDINGS FOR ALL FIGURES**

**FACULTY ENGAGEMENT**

More than half (59 percent) of provosts report that faculty current feel at least very engaged with their work, but they are less likely to report that faculty feel supported or connected to the administration. Provosts are most likely to report that the deans and chairs (79 percent) at their institution are primarily responsible for ensuring faculty are supported, engaged, and connected. Provosts from private institutions are more likely to report that faculty at their institution are at least very engaged (67 percent for private institutions, and 51 percent for public institutions).

**To what extent do you believe faculty currently feel... (n=178)**

**At your institution, who is primarily responsible for ensuring faculty are supported, engaged, and connected? (n=178)**

## KEY FINDINGS FOR ALL FIGURES

# FACULTY ENGAGEMENT: RESOURCES

Almost all provosts report that they believe faculty at their institution would describe the resources and tools made available to them during the pandemic as at least somewhat effective. Overall, mass emails (79 percent), services managed at the college or department level (74 percent), and institutional offices that are tasked with providing faculty services are the most common channels available to faculty to ensure they are supported, engaged and connected. Provosts from public institutions are more likely to report that faculty at their institution use their institution's website as a channel for support, engagement, and connection (69 percent for private institutions, and 82 percent for public institutions).

**Please indicate your level of agreement with the following statement: I believe faculty would describe the resources and tools made available to them during the pandemic as... (n=175)**

**Through what channel(s) are resources and tools made available to faculty to ensure they are supported, engaged, and connected? Please select all that apply.**

**Resources and tools are made available to faculty through... (n=177)**

## KEY FINDINGS FOR ALL FIGURES

# FACULTY ENGAGEMENT: SUPPORT

Most provosts (83 percent) report that they believe faculty at their institution would say that they do not have the right resources and tools to help them feel supported, engaged, and connected. When asked whether specific types of supports were provided to faculty member during the pandemic, provosts are most likely to report that their institution provided a short-term plan for getting through the crisis (89 percent), resources and tools for how to work remotely (87 percent), and short courses on best practice for online teaching and learning (86 percent). Provosts from public institutions are more likely to report that faculty at their institution were provided with short courses on best practices in remote learning (82 percent for private institutions, and 93 percent for public institutions).

### How likely or unlikely are your faculty to say they have the right resources and tools to help them feel supported, engaged, and connected? (n=169)

### Did your institution provide any of the following to faculty members? Please select all that apply. (n=175)

## KEY FINDINGS FOR ALL FIGURES

# PROGRAM FORMATS

More than half of provosts (62 percent) report that students at their institution prefer in-person courses over online courses when both are offered. Few provosts (15 percent) report that students at their institution have no preference. Provosts from public institutions are much less likely to report that students at their institution prefer in-person classes over online classes when both are offered (82 percent for private institutions, and 44 percent for public institutions). Meanwhile, survey results do not show any significant differences between provosts at the regional level.

### Based on student enrollment data over the past two years, do students prefer in-person or online courses when both are offered? Students tend to... (n=172)

KEY FINDINGS FOR ALL FIGURES

# FACULTY SATISFACTION

Most provosts (70 percent) report that their institution surveys its faculty, staff, and administrators to assess their job satisfaction. Provosts also report that their institution is likely to use online tools to help build morale among faculty and staff. Newsletters with recent institutional events and decisions are the most common type (69 percent), followed by online mental health resources (51 percent), and online channels for faculty and staff to ask questions to leadership (42 percent). Survey results do not show any statistically significant differences at the regional or sector level.

## Does your institution survey its faculty, staff, and administrators to assess their job satisfaction? (n=172)

## Which of the following online tools and resources does your institution have to help build morale among faculty and staff? Please select all that apply. (n=170)

**KEY FINDINGS FOR ALL FIGURES**

# FACULTY TURNOVER AND BURNOUT

About half of provosts (51 percent) report that they neither agree nor disagree that their institution has taken concrete steps to address faculty burnout. Provosts also report that faculty and staff turnover rates differ at their institution, such that 48 percent of provosts indicate that faculty turnover has been at least somewhat higher, but 74 percent of provosts indicate that staff turnover has been at least somewhat higher. Survey results do not show any statistically significant differences at the regional or sector level.

**To what extent do you agree or disagree with the following statements regarding faculty turnover and burnout? My institution has taken concrete steps to address faculty burnout. (n=170)**

**To what extent has turnover of the following groups decreased or increased over the past year? As compared to previous years, turnover is... (n=170)**

KEY FINDINGS FOR ALL FIGURES

# THE GREAT RESIGNATION

Provosts report that staff jobs have been more affected by the “Great Resignation” than faculty and administration jobs. Specifically, provosts feel that the Great Resignation has affected their institution’s staff jobs (71 percent) the most, followed by faculty jobs (40 percent), and administration jobs (32 percent). Provosts are most likely to indicate that they neither agree nor disagree when it comes to administration jobs (28 percent). Survey results do not show any statistically significant differences at the regional or sector level.

**To what extent do you agree or disagree with the following statements regarding the “great resignation”? I feel that the “Great Resignation” has affected my institution’s... (n=169)**

## KEY FINDINGS FOR ALL FIGURES

# REMOTE WORK POLICIES

About half of provosts report that their institution has altered its employment policies in a way that will give employees more latitude to work remotely after the pandemic ends. About the same amount of provosts report that their institution is either considering altering their employment policies (26 percent) or that they are unlikely to alter its employment policies at all (23 percent). Survey results do not show any statistically significant differences at the regional or sector level.

### Which of the following best describes your institution? My institution... (n=169)

# VIEW OF TENURE SYSTEM

A little less than two-thirds of provosts agree that tenure remains important and viable at their institution. When considering a system of long-term contracts over the existing tenure system in higher education, about 60 percent of provosts indicate they would favor, and 40 percent indicate they would oppose. Survey results do not show any statistically significant differences at the regional or sector level.

### Please indicate your level of agreement with the following statement: Tenure remains important and viable at my institution. (n=169)

### Do you favor or oppose a system of long-term contracts over the existing tenure system in higher education? (n=169)

KEY FINDINGS FOR ALL FIGURES

# RELIANCE ON NON-TENURE TRACK FACULTY

About three-fourths of provosts report that their institution relies significantly on non-tenure track faculty for instruction, and most do not expect this level of reliance to change in the future. Provosts are most likely to indicate that in the future, their institution will be as reliant as it is today on non-tenure track faculty members (72 percent). Overall, provosts expect that institutions may become more reliant rather than less reliant (19 percent more reliant, 9 percent less reliant). Survey results do not show any statistically significant differences at the regional or sector level.

## Does your institution rely significantly on nontenure track faculty for instruction? (n=169)

## In the future, do you anticipate that your institution will become more reliant, less reliant or about as reliant as it is today on nontenure track faculty members for instruction? (n=169)

KEY FINDINGS FOR ALL FIGURES

# CONSIDERATIONS FOR NEW MODELS

Provosts are split on whether their institution is exploring new faculty models beyond a tenure track versus non-tenure track distinction. Provosts are most likely to indicate that their college has allowed non-tenure track faculty voting rights as a faculty member (48 percent) and multiple-year contracts (42 percent). About the same amount (43-49 percent) of provosts indicate that their college has not considered each of the new faculty models. Provosts indicate that their college is least likely to consider new job titles as a new faculty model (49 percent have not considered). Survey results do not show any statistically significant differences at the regional or sector level.

**As you may know, some colleges are exploring new faculty models beyond a tenure track versus non-tenure track distinction. Please indicate whether your college has done or has considered doing each of the following for nontenure track faculty members. (n=168)**

- My college has not considered doing this
- My college has considered doing this
- My college has done this

Voting rights as a faculty member

New job titles

Multiple-year contracts

Better recognition of the roles of those who are teachers only

**KEY FINDINGS FOR ALL FIGURES**

# **VIEWS ON FACULTY ROLES**

Most provosts tend to indicate that at their institution, teaching is more important than research. Only 2 percent of provosts indicate that research is more important than teaching. Provosts from private institutions are significantly less likely to indicate that teaching is much more important than research; such that only 37 percent of provosts from private institutions agree, but 54 percent of provosts from public institutions agree. Survey results do not show any statistically significant differences at the regional level.

**Which comes closest to your view about faculty roles at your institution? (n=169)**

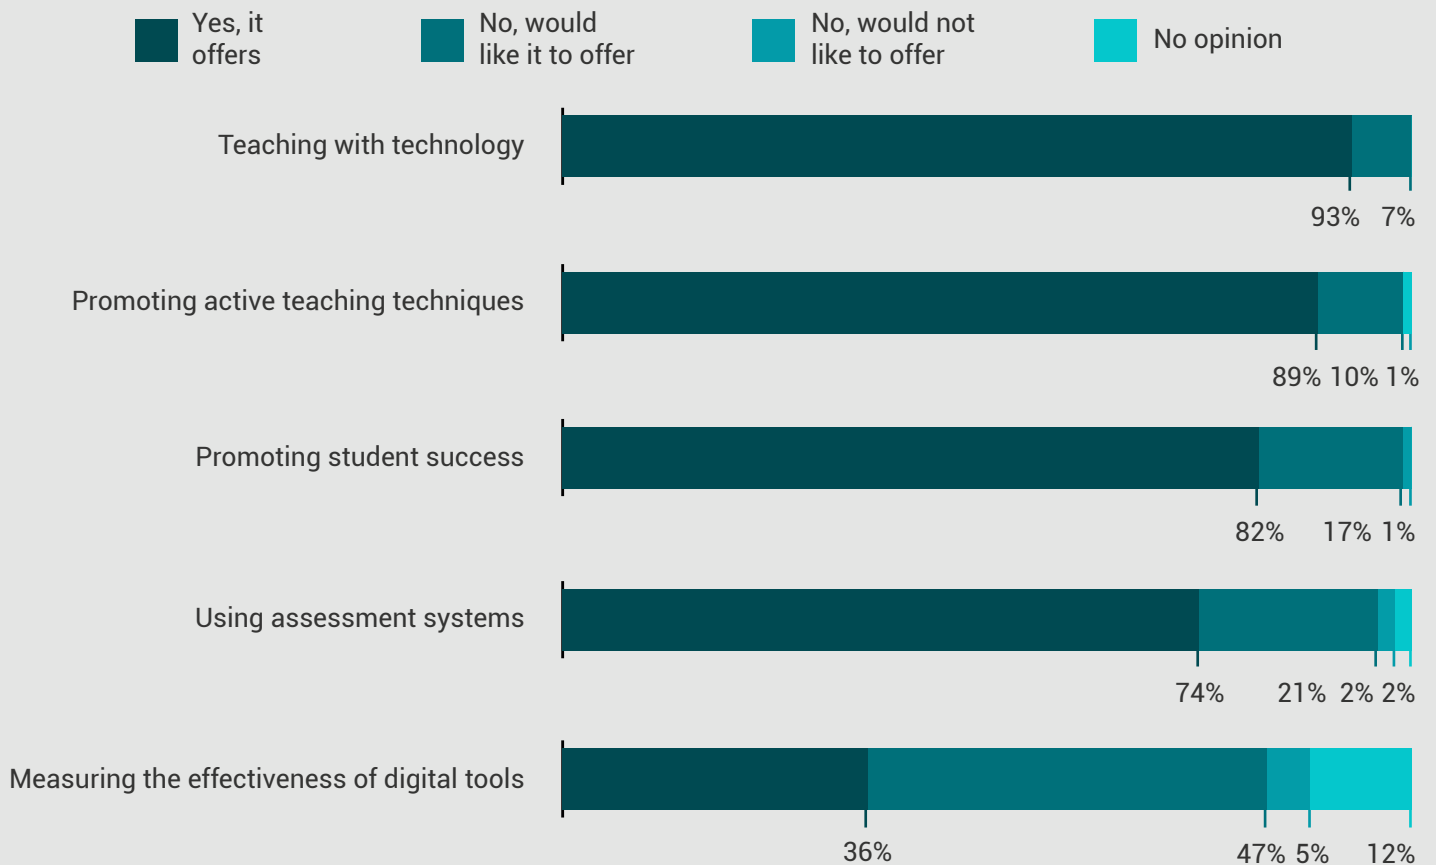

KEY FINDINGS FOR ALL FIGURES

# PROFESSIONAL DEVELOPMENT

Most provosts indicate that their institution currently offers different types of professional development, but are least likely to offer professional development about measuring the effectiveness of digital tools. A little less than half (47 percent) of provosts indicate that this is a development area they would like their institution to offer. On the other hand, provosts are most likely to indicate that their institution offers professional development around teaching with technology (93 percent are currently offering this). Survey results do not show any statistically significant differences at the regional level or sector level.

**Does your institution currently offer, or would you like them to offer, professional development for faculty members in each of the following areas? (n=168)**

KEY FINDINGS FOR ALL FIGURES

# AWARENESS OF GENERAL MENTAL HEALTH

Provosts are more likely to be aware of faculty, staff, and undergraduate mental health than graduate student mental health. Provosts are most likely to indicate that they are very aware of faculty mental health (65 percent), followed by undergraduate students (53 percent), staff (44 percent) and graduate students (25 percent). Provosts at private institutions are more likely to be at least somewhat aware of graduate student mental health (82 percent) compared to only 49 percent of provosts from public institutions. Survey results do not show any statistically significant differences at the regional level.

## How would you rate your own level of awareness of the general state of mental health as it relates to following members of your community? (n=178)

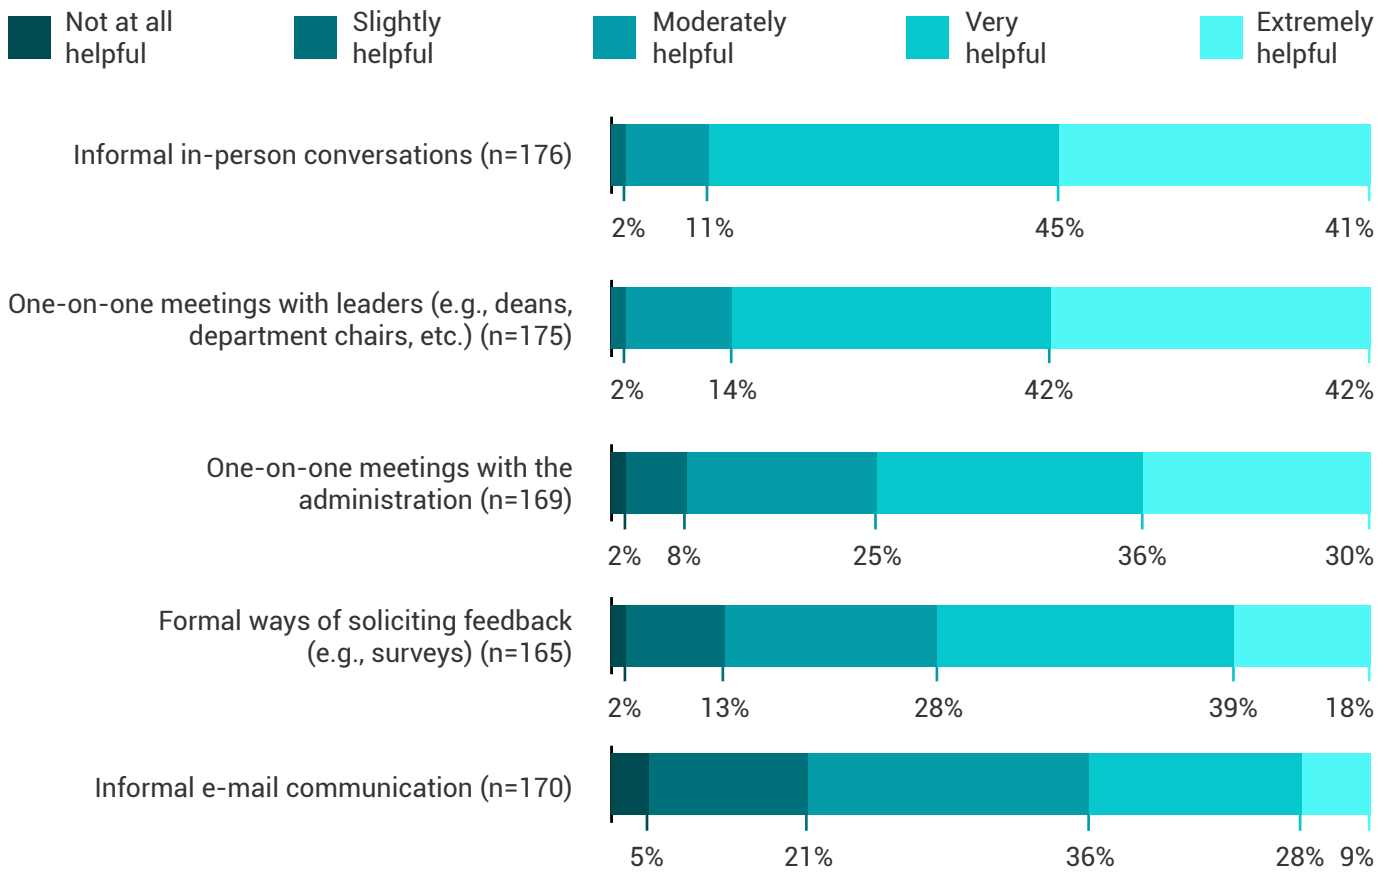

KEY FINDINGS FOR ALL FIGURES

# INCREASING MENTAL HEALTH AWARENESS

Provosts are most likely to indicate that informal in-person conversations and one-on-one meetings with leaders are the most helpful when it comes to increasing their awareness of general mental health of faculty, staff, and administrators. Informal in-person conversations (86 percent) are approximately equally helpful as one-on-one meetings with leaders (84 percent). The least helpful method is informal e-mail communication, though 37 percent of provosts indicate that it is at least very helpful to them.

## How helpful are each of the following when it comes to increasing your awareness of the general state of mental health of faculty, staff, and administrators?

## KEY FINDINGS FOR ALL FIGURES

# MENTAL HEALTH SUPPORT

When considering the areas in which their leadership team receives mental health support, the most common type of support comes from initiatives from other offices. About half of provosts indicate that their leadership team receives support from on-campus counseling services (48 percent), and about 25 percent of provosts provide support within their own office. Provosts from private institutions are more likely than provosts from public institutions to indicate that their leadership team receives support from on-campus counseling (56 percent for private, 41 percent for public).

### From which of the following areas does your leadership team receive mental health support? (n=178)

**KEY FINDINGS FOR ALL FIGURES**

# MENTAL HEALTH INITIATIVES

Almost all provosts indicate that their institution find supporting faculty and staff mental health to be at least somewhat important. Although provosts tend to indicate that their institution prioritizes mental health (90 percent), a smaller proportion of provosts agree that their institution has formal plans to address mental health among faculty and staff (35 percent). Finally, while about half of provosts (49 percent) indicate that their institution provides trainings to leaders to support the mental health needs of their faculty and staff, 41 percent of those provosts also indicate that those trainings are optional.

## Does your institution provide training for those in leadership positions to help them support the mental health needs of their faculty and staff? (n=178)

## What amount of importance does your institution place on supporting faculty and staff mental health? My institution finds supporting faculty and staff mental health to be... (n=178)

## To what extent do you agree or disagree with the following statement? My institution has formal plans to address the mental health needs among faculty and staff. (n=178)

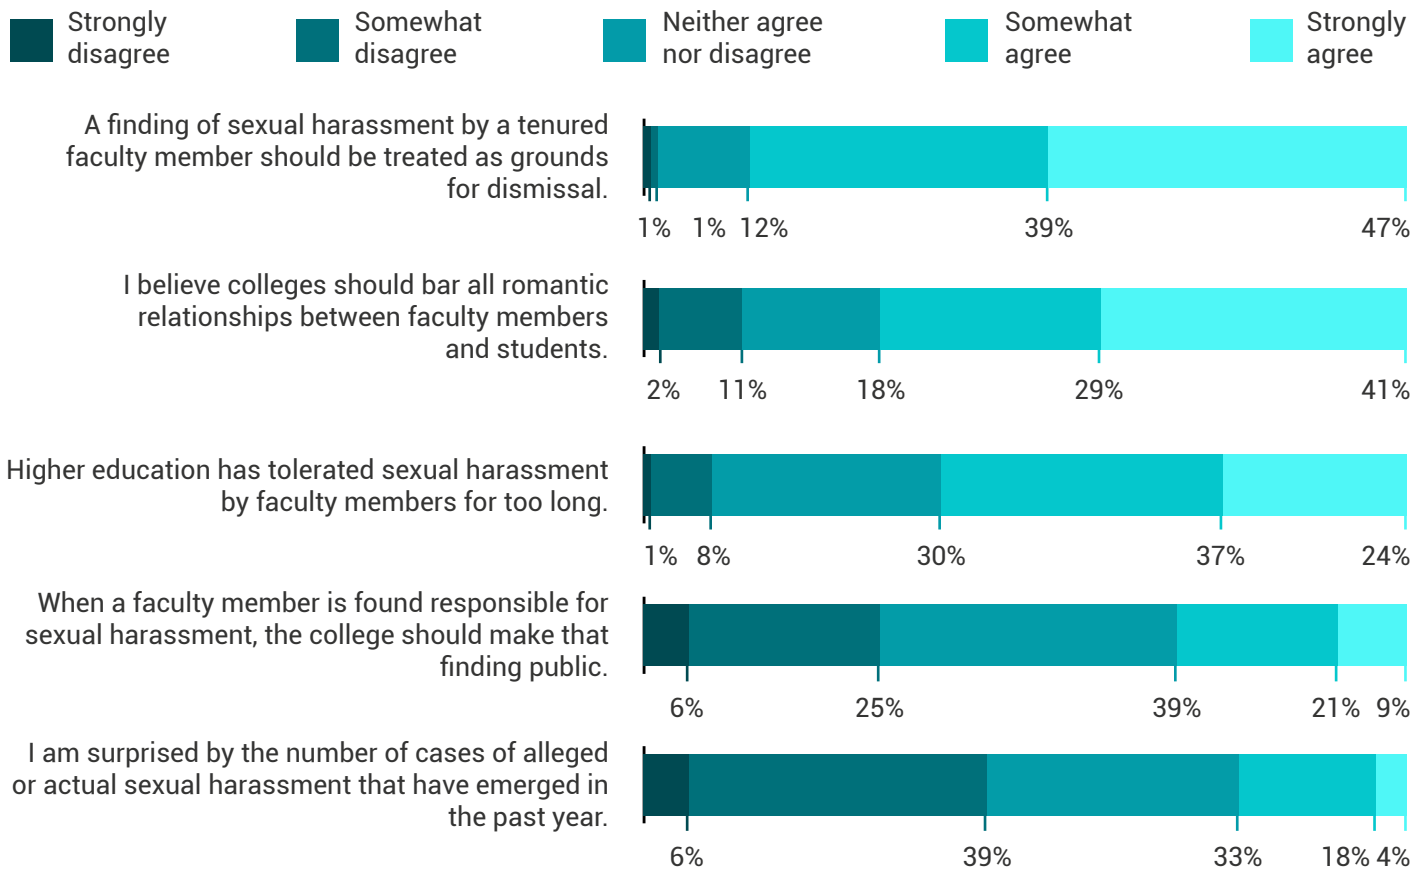

**KEY FINDINGS FOR ALL FIGURES**

# VIEWS ON FACULTY SEXUAL HARASSMENT

Most provosts agree that a finding of sexual harassment by a tenured faculty member should be treated as grounds for dismissal. In addition, about two-thirds of provosts (69 percent) agree that colleges should bar all romantic relationships between faculty members and students. Finally, provosts vary in whether they are surprised by the number of cases of alleged or actual sexual harassment that have emerged in the past year, such that about 21 percent agree, 34 percent neither agree or disagree, and 46 percent disagree.

**Many colleges have recently dealt with allegations of faculty members abusing their positions to sexually harass or assault junior colleagues or students. Please indicate your level of agreement with the following statements: (n=158)**

KEY FINDINGS FOR ALL FIGURES

# ADDRESSING SEXUAL HARASSMENT

Most provosts agree that their college responds effectively and fairly to allegations of sexual harassment. Overall, 58 percent of provosts report that their college bars all romantic relationships between faculty members and students. Provosts from private institutions (70 percent) are much more likely to agree than those from public institutions (45 percent). Finally, provosts are likely to disagree that their institution has tolerated sexual harassment by faculty members for too long (78 percent).

**Please indicate your level of agreement with the following statements about what your institution has done to address sexual harassment: (n=158)**

KEY FINDINGS FOR ALL FIGURES

# ALLEGATIONS OF SEXUAL HARASSMENT

About one-fourth of provosts report that there have been allegations of sexual harassment against faculty members at their institution within the past year. Overall, provosts tend to be either not very concerned (48 percent) or not concerned at all (23 percent) that there will be a backlash against college's efforts to prevent sexual assault and sexual harassment. Survey results do not show any statistically significant differences at the regional or sector level.

## Have there been allegations of sexual harassment against any faculty members at your college in the past year? (n=158)

## How concerned are you that there will be a backlash against colleges' efforts to prevent sexual assault and sexual harassment? (n=158)

KEY FINDINGS FOR ALL FIGURES

# GRADUATE STUDENT UNIONS

Most provosts do not believe that graduate students should have the right to unionize; given that a graduate student's primary role is a student, and their second role is an employee. Very few provosts (4 percent) indicate that their college has a graduate student union. Survey results do not show any statistically significant differences at the regional or sector level.

## Do you believe graduate students should or should not have the right to unionize? (n=157)

## Which of the following is a bigger factor in why you do not think graduate students should have the right to unionize? (n=98)

## Does your college have a graduate student union? (n=157)

# GRADUATE STUDENT ADMISSIONS

More than half of provosts (59 percent) neither agree nor disagree that graduate programs at higher education institutions in this county are admitting more Ph.D. students than they should, given the current job market. This suggests that provosts are unsure about how they feel. However, provosts are more likely to agree (29 percent) than disagree (12 percent). Survey results do not show any statistically significant differences at the regional or sector level.

## Please indicate your level of agreement with the following statement: Graduate programs at higher education institutions in this country are admitting more Ph.D. students than they should, given the current job market. (n=169)

KEY FINDINGS FOR ALL FIGURES

# NEW POLICIES AMIDIST PROTESTS

Since the widespread protests against police brutality, a little over of half of provosts indicate that their institution has at least considered re-examining curriculum to assure it is inclusive and diverse. A similar amount of provosts (50 percent) report that their college has at least considered further expanding the institution’s student recruiting into underserved communities. Provosts are very unlikely to report that their institution has at least considered cutting ties to local police departments (1 percent). Survey results do not show any statistically significant differences at the regional or sector level.

**Since the widespread protests in the summer of 2020 against police brutality that disproportionately affects Black lives, many institutions have adopted new policies and practices.**

*Which of the following policies or structural changes has your institution*

KEY FINDINGS FOR ALL FIGURES

# RECEPTIVITY OF NEW POLICIES

Most provosts report that faculty at their institution were receptive to new changes to policies and practices, and that their institution was quite comfortable making said changes. On average, 63 percent of provosts report that faculty at their institution were at least very receptive to changes. Provosts from private institutions are more likely than provosts at public institutions to report that their staff were at least very receptive (71 percent for private, 54 percent for public). Similarly, provosts from private institutions are more likely than provosts at public institutions to report that their institution was at least very comfortable making changes (83 percent for private, 69 percent for public).

**How receptive were faculty to these changes? (n=151)**

**How comfortable was the institution with making these changes? (n=150)**

## DETAILED TABLES

Please indicate your level of agreement with the following statements:								
	All Institutions, by Sector			Public			Private Nonprofit	
	All	Private Nonprofit	Public	Assoc.	Master's/ Bacc.	Doctoral	Bacc.	Doctoral/ Master's
<b>I am glad I pursued administrative work.</b>								
% Strongly disagree	1	1	0	0	0	0	3	0
% Disagree	5	4	7	6	11	7	3	5
% Neither agree nor disagree	9	8	10	11	11	7	7	10
% Agree	52	54	53	53	50	64	67	46
% Strongly agree	33	32	30	31	28	21	20	39
<b>My job is more focused on financial and management issues than on academic issues.</b>								
% Strongly disagree	7	7	9	6	6	21	10	5
% Disagree	40	31	50	56	33	50	30	29
% Neither agree nor disagree	26	28	26	28	33	14	27	29
% Agree	23	31	13	6	28	14	27	34
% Strongly agree	3	4	3	6	0	0	7	2
<b>There is a fundamental difference in perspective between faculty members and administrators.</b>								
% Strongly disagree	0	0	0	0	0	0	0	0
% Disagree	10	13	6	8	0	7	10	12
% Neither agree nor disagree	11	14	9	6	6	21	13	15
% Agree	60	50	71	72	83	50	53	49
% Strongly agree	19	24	14	14	11	21	23	24

What is your age?								
	All Institutions, by Sector			Public			Private Nonprofit	
	All	Private Nonprofit	Public	Assoc.	Master's/ Bacc.	Doctoral	Bacc.	Doctoral/ Master's
% Under 30	0	0	0	0	0	0	0	0
% 30 to 39	1	3	0	0	0	0	7	0
% 40 to 49	12	13	10	19	0	0	17	10
% 50 to 59	46	38	54	50	67	50	30	41
% 60 to 69	36	43	30	28	28	36	43	44
% 70 and older	3	3	4	0	6	14	0	5
% Prefer not to respond	1	1	1	3	0	0	3	0

With which of the following gender identities do you most identify?								
	All Institutions, by Sector			Public			Private Nonprofit	
	All	Private Nonprofit	Public	Assoc.	Master's/ Bacc.	Doctoral	Bacc.	Doctoral/ Master's
% Female	47	49	43	47	28	50	57	44
% Male	51	50	54	47	72	50	43	54
% Non-binary/Gender non-conforming	1	0	1	3	0	0	0	0
% Not listed/Prefer to self-describe (specify, if desired):	0	0	0	0	0	0	0	0
% Prefer not to respond	1	1	1	3	0	0	0	2

## **ABOUT *INSIDE HIGHER ED***

*Inside Higher Ed* is the leading digital media company serving the higher education space. Since our founding in 2004, we have become the go-to online source for higher education news, analysis, resources and services. Our mission is to serve all of higher education - individuals, institutions, corporations and non-profits - so they can do their jobs better, transforming their lives and those of the students they serve. We are proud to have earned the trust and loyalty of our 3.2 million monthly readers by speaking as a fiercely independent voice, providing thoughtful, substantive analysis on the pressing issues facing higher education today.
